Lead Editor: Ewan Buckingham

Technical Reviewer: Andy Olsen

Editorial Board: Clay Andres, Steve Anglin, Mark Beckner, Ewan Buckingham, Tony Campbell,

Gary Cornell, Jonathan Gennick, Jonathan Hassell, Michelle Lowman, Matthew Moodie, Duncan Parkes,

Jeffrey Pepper, Frank Pohlmann, Ben Renow-Clarke, Dominic Shakeshaft, Matt Wade, Tom Welsh

Project Manager: Sofia Marchant

Copy Editor: Damon Larson

Associate Production Director: Kari Brooks-Copony

Production Editor: Laura Esterman

Compositor: Molly Sharp

Proofreader: Lisa Hamilton

Indexer: BIM Indexing and Proofreading Services

Artist: April Milne

Cover Designer: Kurt Krames

Manufacturing Director: Tom Debolski

Introduction	xxi

PART 1 ■ ■ ■ Introducing ASP.NET MVC

■ CHAPTER 1	What's the Big Idea?	3
	A Brief History of Web Development	3
	Traditional ASP.NET	4
	What's Wrong with Traditional ASP.NET?	4
	Web Development Today	5
	Web Standards and REST	6
	Agile and Test-Driven Development	6
	Ruby on Rails	6
	Key Benefits of ASP.NET MVC	7
	Model-View-Controller Architecture	7
	Extensibility	8
	Testability	8
	Tight Control over HTML	8
	Powerful New Routing System	9
	Built on the Best Parts of the ASP.NET Platform	9
	.NET 3.5 Language Innovations	10
	ASP.NET MVC Is Open Source	10
	Who Should Use ASP.NET MVC?	10
	Comparisons with ASP.NET WebForms	11
	Comparisons with Ruby on Rails	11
	Comparisons with MonoRail	12
	Summary	13

CHAPTER 2	Your First ASP.NET MVC Application	15
	Preparing Your Workstation	15
	Creating a New ASP.NET MVC Project	16
	Removing Unnecessary Files	18
	How Does It Work?	19
	Rendering Web Pages	20
	Creating and Rendering a View	20
	Adding Dynamic Output	22
	A Starter Application	23
	The Story	23
	Linking Between Actions	23
	Designing a Data Model	25
	Building a Form	26
	Handling Form Submissions	28
	Adding Validation	31
	Finishing Off	33
	Summary	35
 CHAPTER 3	 Prerequisites	 37
	Understanding Model-View-Controller Architecture	37
	The Smart UI (Anti-Pattern)	38
	Separating Out the Domain Model	39
	Three-Tier Architecture	40
	Model-View-Controller Architecture	41
	Variations on Model-View-Controller	43
	Domain Modeling	44
	An Example Domain Model	44
	Entities and Value Objects	45
	Ubiquitous Language	45
	Aggregates and Simplification	46
	Keeping Data Access Code in Repositories	48
	Using LINQ to SQL	49
	Building Loosely Coupled Components	56
	Taking a Balanced Approach	57
	Using Inversion of Control	57
	Using an IoC Container	60
	Getting Started with Automated Testing	61
	Unit Tests and Integration Tests	63
	The Red-Green Development Style	64

New C# 3 Language Features	68
The Design Goal: Language Integrated Query	68
Extension Methods	68
Lambda Methods	70
Generic Type Inference	71
Automatic Properties	71
Object and Collection Initializers	72
Type Inference	73
Anonymous Types	73
Using LINQ to Objects	76
Lambda Expressions	77
IQueryable<T> and LINQ to SQL	78
Summary	80

■ CHAPTER 4 **SportsStore: A Real Application.** 81

Getting Started	82
Creating Your Solutions and Projects	83
Starting Your Domain Model	85
Creating an Abstract Repository	85
Making a Fake Repository	86
Displaying a List of Products	87
Removing Unnecessary Files	87
Adding the First Controller	88
Setting Up the Default Route	89
Adding the First View	90
Connecting to a Database	92
Defining the Database Schema	92
Setting Up LINQ to SQL	94
Creating a Real Repository	95
Setting Up Inversion of Control	97
Creating a Custom Controller Factory	97
Using Your IoC Container	99
Creating Automated Tests	102
Configuring a Custom URL Schema	106
Adding a RouteTable Entry	107
Displaying Page Links	108
Styling It Up	114
Defining Page Layout in the Master Page	114
Adding CSS Rules	115
Creating a Partial View	117
Summary	119

CHAPTER 5	SportsStore: Navigation and Shopping Cart	121
	Adding Navigation Controls	121
	Filtering the Product List	122
	Defining a URL Schema for Categories	125
	Building a Category Navigation Menu	131
	Building the Shopping Cart	140
	Defining the Cart Entity	141
	Adding “Add to Cart” Buttons	144
	Giving Each Visitor a Separate Shopping Cart	146
	Creating CartController	148
	Displaying the Cart	150
	Removing Items from the Cart	153
	Displaying a Cart Summary in the Title Bar	154
	Submitting Orders	156
	Enhancing the Domain Model	157
	Adding the “Check Out Now” Button	159
	Prompting the Customer for Shipping Details	159
	Defining an Order Submitter IoC Component	161
	Completing CartController	161
	Implementing the EmailOrderSubmitter	167
	Summary	169
 CHAPTER 6	 SportsStore: Administration and Final Enhancements	 171
	Adding Catalog Management	172
	Creating AdminController: A Place for the CRUD Features	172
	Rendering a Grid of Products in the Repository	175
	Building a Product Editor	179
	Creating New Products	186
	Deleting Products	187
	Securing the Administration Features	188
	Setting Up Forms Authentication	189
	Using a Filter to Enforce Authentication	190
	Displaying a Login Prompt	191
	Image Uploads	195
	Preparing the Domain Model and Database	195
	Accepting File Uploads	196
	Displaying Product Images	197
	Summary	199

PART 2 ■ ■ ■ ASP.NET MVC in Detail

CHAPTER 7	Overview of ASP.NET MVC Projects	203
	Developing MVC Applications in Visual Studio	203
	The Default MVC Project Structure	204
	Naming Conventions	207
	The Initial Application Skeleton	208
	Debugging MVC Applications and Unit Tests	208
	Using the Debugger	211
	Stepping into the .NET Framework Source Code	212
	Stepping into the ASP.NET MVC Source Code	213
	The Request Processing Pipeline	213
	Stage 1: IIS	214
	Stage 2: Core Routing	216
	Stage 3: Controllers and Actions	216
	Stage 4: Action Results and Views	218
	Summary	219
CHAPTER 8	URLs and Routing	221
	Putting the Programmer Back in Control	221
	Setting Up Routes	222
	Understanding the Routing Mechanism	224
	Adding a Route Entry	226
	Using Parameters	228
	Using Defaults	229
	Using Constraints	230
	Accepting a Variable-Length List of Parameters	233
	Matching Files on the Server's Hard Disk	234
	Using IgnoreRoute to Bypass the Routing System	235
	Generating Outgoing URLs	236
	Generating Hyperlinks with <code>Html.ActionLink</code>	237
	Generating Links and URLs from Pure Routing Data	239
	Performing Redirections to Generated URLs	240
	Understanding the Outbound URL-Matching Algorithm	241
	Generating Hyperlinks with <code>Html.ActionLink<T></code> and Lambda Expressions	243
	Working with Named Routes	244

Unit Testing Your Routes	245
Testing Inbound URL Routing	245
Testing Outbound URL Generation	249
Further Customization	251
Implementing a Custom RouteBase Entry	251
Implementing a Custom Route Handler	252
URL Schema Best Practices	253
Make Your URLs Clean and Human-Friendly	254
Follow HTTP Conventions	255
Search Engine Optimization	257
Summary	258

■ CHAPTER 9 **Controllers and Actions**

An Overview	259
Comparisons with ASP.NET WebForms	260
All Controllers Implement IController	260
The Controller Base Class	261
Receiving Input	262
Getting Data from Context Objects	262
Using Action Method Parameters	264
Invoking Model Binding Manually in an Action Method	265
Producing Output	266
Understanding the ActionResult Concept	266
Returning HTML by Rendering a View	269
Performing Redirections	273
Returning Textual Data	277
Returning JSON Data	279
Returning JavaScript Commands	279
Returning Files and Binary Data	280
Creating a Custom Action Result Type	283
Using Filters to Attach Reusable Behaviors	286
Introducing the Four Basic Types of Filters	286
Applying Filters to Controllers and Action Methods	288
Creating Action Filters and Result Filters	289
Creating and Using Authorization Filters	293
Creating and Using Exception Filters	296
Bubbling Exceptions Through Action and Result Filters	299
The [OutputCache] Action Filter	300
Other Built-In Filter Types	302

Controllers As Part of the Request Processing Pipeline	303
Working with DefaultControllerFactory	303
Creating a Custom Controller Factory	305
Customizing How Action Methods Are Selected and Invoked	306
Testing Controllers and Actions	312
How to Arrange, Act, and Assert	313
Testing a Choice of View and ViewData	313
Testing Redirections	315
More Comments About Testing	316
Mocking Context Objects	316
Summary	320

CHAPTER 10 Views 321

How Views Fit into ASP.NET MVC	321
The WebForms View Engine	322
View Engines Are Replaceable	323
WebForms View Engine Basics	323
Adding Content to a View Template	323
Five Ways to Add Dynamic Content to a View Template	323
Using Inline Code	324
Why Inline Code Is a Good Thing in MVC View Templates	326
Understanding How MVC Views Actually Work	326
Understanding How ASPX Templates Are Compiled	327
Understanding ViewData	329
Rendering ViewData Items Using ViewData.Eval	330
Using HTML Helper Methods	332
The Framework's Built-In Helper Methods	333
Creating Your Own HTML Helper Methods	342
Using Partial Views	344
Creating a Partial View	344
Rendering a Partial View Using Server Tags	349
Using Html.RenderAction to Create Reusable Widgets with	
Application Logic	351
What Html.RenderAction Does	352
When It's Appropriate to Use Html.RenderAction	352
Creating a Widget Based on Html.RenderAction	353
Sharing Page Layouts Using Master Pages	355
Using Widgets in MVC View Master Pages	356
Implementing a Custom View Engine	358
A View Engine That Renders XML Using XSLT	358

Using Alternative View Engines	363
Using the NVelocity View Engine	363
Using the Brail View Engine	365
Using the Spark View Engine	366
Using the NHaml View Engine	367
Summary	368
 ■ CHAPTER 11 Data Entry	 369
Model Binding	369
Model-Binding to Action Method Parameters	370
Model-Binding to Custom Types	371
Invoking Model Binding Directly	374
Model-Binding to Arrays, Collections, and Dictionaries	376
Creating a Custom Model Binder	378
Using Model Binding to Receive File Uploads	381
Validation	383
Registering Errors in ModelState	383
View Helpers for Displaying Error Information	386
How the Framework Maintains State in Input Controls	388
Performing Validation During Model Binding	389
Moving Validation Logic into Your Model Layer	390
About Client-Side (JavaScript) Validation	395
Wizards and Multistep Forms	396
Verification	406
Implementing a CAPTCHA	406
Confirmation Links and Tamper-Proofing with HMAC Codes	414
Summary	418
 ■ CHAPTER 12 Ajax and Client Scripting	 419
Why You Should Use a JavaScript Toolkit	419
ASP.NET MVC's Ajax Helpers	420
Fetching Page Content Asynchronously Using Ajax.ActionLink	421
Submitting Forms Asynchronously Using Ajax.BeginForm	427
Invoking JavaScript Commands from an Action Method	428
Reviewing ASP.NET MVC's Ajax Helpers	430
Using jQuery with ASP.NET MVC	431
Referencing jQuery	431
Basic jQuery Theory	433
Adding Client-Side Interactivity to an MVC View	438
Ajax-Enabling Links and Forms	442

Client/Server Data Transfer with JSON	449
Fetching XML Data Using jQuery	452
Animations and Other Graphical Effects	453
jQuery UI's Prebuilt User Interface Widgets	454
Implementing Client-Side Validation with jQuery	456
Summarizing jQuery	458
Summary	458
CHAPTER 13 Security and Vulnerability	459
All Input Can Be Forged	459
Forging HTTP Requests	461
Cross-Site Scripting and HTML Injection	463
Example XSS Vulnerability	464
ASP.NET's Request Validation Feature	465
Filtering HTML Using the HTML Agility Pack	467
Session Hijacking	468
Defense via Client IP Address Checks	469
Defense by Setting the HttpOnly Flag on Cookies	469
Cross-Site Request Forgery	470
Attack	471
Defense	471
Preventing CSRF Using the Anti-Forgery Helpers	472
SQL Injection	473
Attack	474
Defense by Encoding Inputs	474
Defense Using Parameterized Queries	474
Defense Using Object-Relational Mapping	475
Using the MVC Framework Securely	475
Don't Expose Action Methods Accidentally	475
Don't Allow Model Binding to Change Sensitive Properties	476
Summary	476
CHAPTER 14 Deployment	477
Server Requirements	477
Requirements for Shared Hosting	478
IIS Basics	478
Understanding Web Sites and Virtual Directories	478
Binding Web Sites to Hostnames, IP Addresses, and Ports	480
How IIS Handles Requests and Invokes ASP.NET	480

Deploying Your Application	483
Copying Your Application Files to the Server	484
Using Visual Studio 2008's Publish Feature	485
Making It Work on Windows Server 2003/IIS 6	486
Making It Work on IIS 7	494
Making Your Application Behave Well in Production	497
Supporting Changeable Routing Configurations	497
Supporting Virtual Directories	498
Using ASP.NET's Configuration Facilities	498
Controlling Compilation on the Server	502
Detecting Compiler Errors in Views Before Deployment	503
Summary	503

■ CHAPTER 15 **ASP.NET Platform Features** 505

Windows Authentication	506
Preventing or Limiting Anonymous Access	508
Forms Authentication	509
Setting Up Forms Authentication	510
Using Cookieless Forms Authentication	513
Membership, Roles, and Profiles	514
Setting Up a Membership Provider	516
Using a Membership Provider with Forms Authentication	520
Creating a Custom Membership Provider	521
Setting Up and Using Roles	522
Setting Up and Using Profiles	525
URL-Based Authorization	529
Data Caching	530
Reading and Writing Cache Data	530
Using Advanced Cache Features	533
Site Maps	534
Setting Up and Using Site Maps	535
Creating a Custom Navigation Control with the Site Maps API	536
Generating Site Map URLs from Routing Data	538
Internationalization	540
Setting Up Internationalization	541
Tips for Working with Resource Files	544
Using Placeholders in Resource Strings	545
Performance	546
HTTP Compression	546
Tracing and Monitoring	548

Monitoring Page Generation Times.	549
Monitoring LINQ to SQL Database Queries	550
Summary.	554
 ■ CHAPTER 16 Combining MVC and WebForms.	 555
Using WebForms Technologies in an MVC Application.	555
Using WebForms Controls in MVC Views.	556
Using WebForms Pages in an MVC Web Application.	558
Adding Routing Support for WebForms Pages	559
Using ASP.NET MVC in a WebForms Application.	563
Upgrading an ASP.NET WebForms Application to Support MVC. . . .	564
Getting Visual Studio to Offer MVC Items	568
Interactions Between WebForms Pages and MVC Controllers. . . .	569
Summary.	571
 ■ INDEX	 573
